Gilliam, Ernest

> The Mesilla Valley Irrigation company is composed of farmers living or owning land along the east side of the Rio Grande from Mesquite station, on the Santa Fe railway about thirty-two miles above El Paso, to the state line at Anthony. The canal is about thirty-two miles long. There are at present about thirty stockholders. The company was organized and chartered about three years ago with a capi-tal stock of \$12,000, divided into 12,000 shares of the par value of \$1 per share. The canal is maintained by the levy of assessments on the stock, the stockhold-

canal last year necessitated the digging of about a mile and a half of new ditch besides the annual cleaning. To meet this demand and also to enlarge the canal an assessment was levied, amounting to about \$3,200. Work was begun upon this assessment December 11. The new portion of the caual has been completed and scribable suffering. Hood's Sarsaparilla assessment December 11. The new possessible suffering. Hood's Sarsaparilla tion of the caual has been completed and it purifies the blood and expels the humor, and the skin heals without a scar. Send by February 2. The line of the upper and the skin heals without a scar. Send of the canal has been changed so end of the canal has been changed so the canal has been completed and the cleaning and widening will be sent completed and the cleaning and widening will be finished. that it is believed no such washouts will be experienced in future and the assessments will therefore be light. When the work now in progress is completed the company will have one of the best canals in all the territory.
